

Johnson County REMC Large Power Service Schedule LPS

Availability

Available to members located on or near the Corporation’s multi-phase lines for all types of usage, subject to the established Corporation Service Rules and Regulations.

Applicability

Applicable to existing large power consumers who have installed transformer capacity in excess of 100 kVA, and for new commercial consumers who have installed transformer in excess of 249 kVA.

For determination of the applicable kVA capacity, the Corporation shall consider i) circumstances where the kVA capacity installed by the Corporation exceeds the consumers load requirements by more than standard design, and ii) circumstances where installed capacity is shared by more than one consumer in which case the Corporation shall equitably allocate the KVA capacity between consumers.

Type of Service

Single-phase or multi-phase service, 60 hertz at 120/208 or 277/480 volts.

If the Corporation provides service at the standard primary voltage level (12,470 volts), the consumer shall be responsible for all costs associated with the installation of the primary voltage physical disconnect necessary to isolate the consumer’s facilities from the Corporation’s facilities. The consumer will be responsible to own, operate and maintain all electrical distribution facilities on the customer side of the primary point-of-delivery (typically established at the primary meter).

Monthly Rate

Facility Charge:	\$75.00	per month
Energy Charge:	\$0.04750	per kWh
Demand Charge (Summer):	\$15.70	per kVA *(see breakdown)
Demand Charge (All Other Months):	\$13.70	per kVA *(see breakdown)

The demand charge is comprised of the following:

<u>*Demand Charge Detail</u>	<u>Summer (Jun 1 to Sep 30)</u>	<u>All Other Months (Oct 1 to May 31)</u>
Generation	\$6.80	\$4.80
Transmission/Substation	\$4.95	\$4.95
Distribution Delivery	<u>\$3.95</u>	<u>\$3.95</u>
TOTAL	<u>\$15.70</u>	<u>\$13.70</u>

Determination of Billing Demand

The member agrees to maintain unity power factor as nearly as practicable. The billing demand shall be the maximum kilovolt-ampere demand established by the consumer for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter installed by the Corporation.

Monthly Minimum Charge

The monthly minimum charge under this schedule shall be the highest one of the following charges as determined for the consumer in question:

- 1. The monthly minimum charge specified in the contract for service.
- 2. A charge of \$1.10 per kVA of required transformer capacity.

Primary Meter Discount

Where service is provided at the Corporation’s standard primary voltage, the above stated Generation Demand charge shall be reduced by:

Generation (per kVA)	\$0.35
----------------------	--------

Terms and Conditions

- 1. In general, motors having a rated capacity in excess of ten horsepower (10 h.p.) must be three-phase.
- 2. Service will be rendered only after the following conditions are met:
 - a. The consumer will give satisfactory assurance by means of a written agreement as to the character, amount and duration of the business offered.
 - b. In no case, however, will the minimum bill for three-phase service be less than that previously specified under “Monthly Minimum Charge”.

Rate Adjustment

The above rates are subject to rate adjustments stated in [Appendix A](#).

Other Charges and Terms of Service

This schedule is applicable to charges and other terms of service outlined in [Appendix B](#).
